SAT 9 JULY <i>Face to face</i>	ISLAMIC PATTERNS	Steve Eades	All levels	£25 / £30	
<i>Geometric patterns are amongst the most recognisable visual expressions of Islamic Art and Architecture, and were created by craftsmen using simple tools and a basic understanding of geometry by drawing circles and lines. Islamic artists tend to abide by the concept of aniconism, ie the belief that the creation of living beings, like humans, is a job for God and should therefore be left out of artwork. Islamic aniconism is partly influenced by the prohibition of idolatry, or the worshiping of an idol or image in place of God. Because of the belief in Islamic aniconism, flower designs were used by artists in the place of human or animal forms as Islamic art patterns. These floral motifs seen in ceramics, carpets, tiles etc avoid a focus on concepts of realism, like growth or life and can have theological meanings. Arabesque surface decoration became widely popular on objects and buildings, and other plant-based designs continued to form complex, scrolling patterns. This workshop will cover examples of Islamic patterns throughout the world; basic geometry; drawing simple patterns; drawing a more complicated geometric pattern and colouring it</i>
